All along the bike path where the County is doing work. May need to have City crews follow up with signs along Ocean Front Walk too.

Here is your sign for "No Motor-Driven Scooters". Sorry, the approved wording is "Motor-Driven", not "Electric".

Refer to LAMC Sec. 63.44.O.1 for the city law.

This sign will be modified MUTCD R5-8 sign.

The dimensions will be 24" wide by 48" high, and mounted on the right side of wherever they would be riding.

Dear Bike Path Safety Roundtable Members,

We will be **postponing the September 17, 2018 meeting until further notice**. At the County level, we do agree that the first steps in maintaining continuity and safety is to develop a guiding document for County paths and trails. We have a draft motion to begin the research and establishment of this document, but as you can imagine it will take much time to develop such a framework.

It will likely be best for us all to wait that time period out and then re-group to understand what moving forward on enforcement and municipal code changes as well as continuity by ground markings and signage looks like.

I appreciate your understanding and think that our first meeting was a great success that led us to move forward on this item. I know that many cities have developed their own programs and regulations related to scooters and we will be sure to incorporate those into the Department of Public Works study and creation of this guiding document.

Please let me know if you have further questions or concerns, I will be sure to update you all as soon as I have more information.

Best,

Stephanie

Subject: Bike Path Roundtable Minutes and Next Steps

Hi All,

Thanks so much for attending yesterday's roundtable meeting. I know it can be frustrating to have a lot of unanswered questions and the meeting really does speak to the need to us to continue these conversations. As mentioned yesterday, the focus will remain safety and continuity on the path and we hope to make some progress via this group.

The minutes are attached as is a copy of AB 1096, which in 2015, provided for a new understanding of e-bikes and mopeds- interesting to look at (excuse my underlines, those were specific to a moped classification). In addition I just wanted to outline some of the takeaways from the meeting and action items moving forward.

Takeaways:

- Local enforcement is difficult to do, because of manpower and unclear code sections relating to non-human powered vehicles
- Each jurisdiction has a slightly different understanding of code, some have local ordinances and some loosely enforce state code when needed

- We must separate enforcement and policy from signage and ground markings- and will likely be a different group of folks at the table for each (we will tackle policy and then move to perfecting signage in transitions)
- There may be some best practices on types of alert signage, such as flashing lights used in Hermosa and Manhattan, also discussion on bollards for safety reasons

Action Items:

- County Third and Fourth District to work with County Counsel on an official position memo and possibly creation of a guiding document for the bike path/other paths in the County jurisdiction
- Each local jurisdiction to send me their local codes, enforcement and copies of signage used for these local or state ordinances that are being enforced
- I will compile these into one working document to share with this group
- *Please review the minutes and let us know if we have gotten something wrong, we are not perfect believe it or not!*

We discussed our next meeting being focused on policy on two main points, finding clarity in state code and working through local ordinances and possible changes that may come throughout the summer season/launch of pilot programming. We will discuss internally at the County and get back to this group via email, so please let me know if anyone needs to be added to this group. For now, let's hold the next meeting for **Monday, September 17, 2018 @ 3:30pm- same location**. I will send a calendar invite as we get closer and determine who is the best person to be at the table from each jurisdiction, so ***please hold on your own calendars now.***

Thanks again all for participating, looking forward to continuing the conversation.

Best,

Stephanie

Hi Colleen,

The City of Santa Monica has its own ordinance restricting access to the bike path for non-human powered vehicles. Because the City of LA does not have a similar ordinance, we cannot post such signs at this time. We will only be able to post CVC or LAMC when it is enacted.

I know that the City is working to create guidelines for these types of vehicles and I have CC'd Eric from CD11 who may be able to provide some additional information on that.

Best,
Stephanie

Good morning,

Expanding on the update below:

In Redondo Beach at Herondo St., the Class I bike path (The Strand) transitions to a Class IV cycle track that parallels Harbor Drive until Pacific Ave. A Class I bike path then continues through the Redondo Beach Pier structure before exiting onto the beach at Coral Way. This Class I bike path continues into Torrance to Via Riviera, its southerly terminus.

Best regards,

Mario Rodriguez

Subject: RE: Bike Path Roundtable Minutes and Next Steps

Just one update I naturally forgot something- the correct classification for Marvin Braude is below per LA County DPW.

The path is a class 1 path from Temescal Canyon in the North through Venice Fishing Pier where it then continues into class 2 bike lanes along Washington blvd. The Class 1 bike path resumes at Washington Ave/Mildred Ave and continues generally following the alignment of Admiralty Way through Yvonne Burke Park and several parking lots and the path connects to Class 2 bike lanes along Fiji Way Where the path veers off, and reconnects at the main channel off the marina, it becomes class 1 bike path again. The only other change in class are in Hermosa where riders have an option of continuing along the beach on class 1 path or riding the cycle track that runs parallel to Hermosa Ave. (Class IV bikeways or cycle tracks are protected bike lanes that are physically separated from motor traffic with a vertical feature such as curbs, posts, barriers, etc.)

Subject: Bike Path Roundtable Minutes and Next Steps

Hi All,

Thanks so much for attending yesterday's roundtable meeting. I know it can be frustrating to have a lot of unanswered questions and the meeting really does speak to the need to us to continue these conversations. As mentioned yesterday, the focus will remain safety and continuity on the path and we hope to make some progress via this group.

The minutes are attached as is a copy of AB 1096, which in 2015, provided for a new understanding of e-bikes and mopeds- interesting to look at (excuse my underlines, those were specific to a moped classification). In addition I just wanted to outline some of the takeaways from the meeting and action items moving forward.

Takeaways:

- Local enforcement is difficult to do, because of manpower and unclear code sections relating to non-human powered vehicles
- Each jurisdiction has a slightly different understanding of code, some have local ordinances and some loosely enforce state code when needed
- We must separate enforcement and policy from signage and ground markings- and will likely be a different group of folks at the table for each (we will tackle policy and then move to perfecting signage in transitions)
- There may be some best practices on types of alert signage, such as flashing lights used in Hermosa and Manhattan, also discussion on bollards for safety reasons

Action Items:

- County Third and Fourth District to work with County Counsel on an official position memo and possibly creation of a guiding document for the bike path/other paths in the County jurisdiction
- Each local jurisdiction to send me their local codes, enforcement and copies of signage used for these local or state ordinances that are being enforced
- I will compile these into one working document to share with this group
- *Please review the minutes and let us know if we have gotten something wrong, we are not perfect believe it or not!*

We discussed our next meeting being focused on policy on two main points, finding clarity in state code and working through local ordinances and possible changes that may come throughout the summer season/launch of pilot programming. We will discuss internally at the County and get back to this group via email, so please let me know if anyone needs to be added to this group. For now, let's hold the next meeting for **Monday, September 17, 2018 @ 3:30pm- same location**. I will send a calendar invite as we get closer and determine who is the best person to be at the table from each jurisdiction, so ***please hold on your own calendars now***.

Thanks again all for participating, looking forward to continuing the conversation.

Best,

Stephanie

Hi All,

Sending a calendar invite as well with updated parking and agenda information, but wanted to attach it here. As a reminder, this is not a public meeting and is an internal meeting of those with local responsibility along the bike path. Please be sure to let me know who will be attending with you if they are not on this invitation so that we can make sure to set-up the room appropriately.

I have heard from Santa Monica that folks from City Manager's Office will be attending as well and from Torrance that PD may also attend. **Please confirm with me ASAP.** My cell for day of issues is 213-448-6221, feel free to call/text at any time.

Parking: Attendees should print the attached parking pass and park in the 90 minute lot directly adjacent to the park. We ask that the sheet be folded in half and the pass displayed on the dashboard. County marked vehicles do not need to display the pass. In the event that the 90-minute lot is full, folks may park in Lot #77 on Mindanao Way, directly adjacent to the 90-minute lot. The meeting will be in the Community Room, inside the building to the right side of the entrance path to the park.

Best,

Stephanie

Subject: From Sup. Kuehl & Hahn- Bike Path Safety Roundtable Meeting

Dear Partners:

On behalf of Supervisor Kuehl and Supervisor Hahn, we would like to invite you to attend a roundtable meeting on bike path safety on the Marvin Braude Bike Path. The purpose of the meeting will be to understand local jurisdiction safety ordinances and enforcement- with the end goal being to open communication to find best ways to establish ordinance continuity. We know that a similar meeting was held regularly many years ago and we hope to continue to meet on like issues.

Join us on Monday, July 16, 2018 from 3-5pm at the Burton Chace Park Community Room in Marina Del Rey (13650 Mindanao Way, Marina Del Rey, CA 90292). Please be prepared to provide an overview of bike path safety regulations and standards on your portion of the path to begin the conversation. We will arrange parking for you and send a detailed agenda in coming weeks, but **please hold this date on your calendars.**

RSVP to Marley Powell- mpowell@bos.lacounty.gov with names of those attending on behalf of your office.

Thank you,

Stephanie Cohen, Third District & Jayme Wilson, Fourth District

Bike Path Updates- 3/6 mtg

Daniel Quintana <DQUINTAN@dpw.lacounty.gov>

Wed, Mar 7, 2018 at 11:23 AM

To: "Robert Davis (robert.davis@lacity.org)" <robert.davis@lacity.org>

Cc: "eric.bruins@lacity.org" <eric.bruins@lacity.org>, Emiko Thompson <ETHOMP@dpw.lacounty.gov>, "Cohen, Stephanie" <SCohen@bos.lacounty.gov>, Coby Skye <CSKYE@dpw.lacounty.gov>

Hi Bob,

We have about 12.5 foot width of bike path next to the triangular sand area. If we can get 13 feet will help, but would like to maintain at least the same as minimum. As discussed in the field, it will help to grade the sand in the triangle to create a flow line away from the edge of the bike path. If paving is done at the edge of the path to address the broken edges, we recommend a beveled edge as shown in the attached PDF.

Please let me know if you have any questions.

Thank you.

Subject: Bike Path Updates- 3/6 mtg

Importance: High

Hi All,

Wanted to re-cap our meeting today w/ City of Santa Monica, City of LA Parks & Rec and DPW. We discussed some of the transitions on the north end of the path where it meets Santa Monica. As you know it gets tricky because the walk path area swaps where Santa Monica ends from the West side of the bike path to the east side before it becomes Ocean Front Walk. The issue area is the portion of path between the "start" of the bike path at Navy street and the end of Santa Monica at Marine.

We all agreed upon a few items- outlined below (I used my amazing engineering skills to color code everything ☺):

Photo Bike Path- Santa Monica Transition:

1. On the West side of the path, marked in the photo by a blue star, Santa Monica has agreed to repave and grade appropriately their portion of the transition. LA City RAP will be repaving this entire area and Santa Monica will be coordinating with Bob Davis on this re-pavement plan set to take place over the next 6 weeks.
1. A sidewalk marking indicating "ped only" will be implemented at the area with the orange star to assist with those who are walking south from Santa Monica.
1. The area indicated by a green star will be where DPW will extend the white edge line to the crosswalk markings. Hoping that this extension allows peds to see that they should cross.

Photo Bike Path- OFW Transition

1. An additional "no pedestrians" sidewalk marking will be placed where the purple star is located as this portion of the path headed into Santa Monica should not have peds on it. Peds should know to cross over from OFW to walk path to santa monica via the crosswalks here.
1. Some markings on the sidewalk in the area where the pink star is located need to be buffed out/removed to allow for new signage.

Pending other items:

- City of LA (Bob Davis, RAP and Eric Bruins, CD11) will be working out the issue of bike share at park ave. but no path access at that location and will be in touch w/ Daniel when a decision is made on how to move forward
- Daniel will be measuring the path at the start at Navy street to work with Bob Davis during the re-paving project of this stretch of walkway.
- City of LA will be working with City of SM to coordinate repaving of both areas for continuity of pavement.
- Eric & Daniel will be working out MUTC signs on e-bikes and motorized scooters to place at both ends of the path.

I think this covers it all. As you see I have included City of SM, Eric and Bob on this email string. Would be great to set-up a timeline for LA City re-paving and for DPW project start and finish. We want to inform the community and surrounding partners of any closures of the path. Daniel, let me know if I missed anything!

Best,

Stephanie
